Languages: Spanish (Native) | English (C1 Advanced - Oxford Placement Test 93/120)

[EXECUTIVE SUMMARY]

Software Engineer specialized in designing and engineering Full Stack enterprise solutions, leveraging

Currently pursuing a Systems Engineering degree at Universidad Autónoma de Occidente, with rigorous fou

Demonstrated leadership in technical coordination, infrastructure deployment, and incident management i

[PROFESSIONAL ACCREDITATIONS]

* Oxford Placement Test (OOPT): 93 / 120

C1 CEFR Level (Advanced Professional) | Use of English: 93/C1 | Listening: 92/C1

* Full Stack & Artificial Intelligence: Triple Certification

Enterprise Architecture & Applied AI | Spring Boot • Angular • FastAPI • Scikit-Learn

* Database Engineering & SQL: Advanced

Relational Data Modeling & Normalization | PostgreSQL • MySQL • SQLite • Query Optimization

[FEATURED TECHNICAL PROJECTS]

* VeraMarket – Geolocated University Marketplace (2025 – 2026)

Track: Full Stack, Geolocation & Microservices

Tech Stack: FastAPI (Python 3.11+) • Next.js 14 (App Router) • TypeScript • PostgreSQL 15 + PostGIS •

Metrics: PostGIS Spatial Geolocation • Decoupled Monorepo • Mobile-First PWA • JWT/bcrypt Auth

Summary: Geolocated e-commerce platform built for the Universidad Autónoma de Occidente (UAO) communi

Repository: Private / Confidential (Code demo available upon technical request)

* Nexo – Food Rescue & Redistribution Platform (2026)

Track: Serverless PWA & Social Impact

Tech Stack: TypeScript • Next.js / React • Serverless PWA • Tailwind CSS • Node.js • Civic Tech Archi

Metrics: Low Operational Overhead • High Social Efficiency • Cold Chain Enforcement • Auditable Repor

Summary: High-impact civic technology designed to mitigate perishable food waste in Cali, Colombia. C

Repository: Private / Confidential (Code demo available upon technical request)

* SERVICIUDAD Cali – Enterprise System with Canary Deployments (2026)

Track: Enterprise Architecture & Canary Deployments

Tech Stack: Java 17+ • Spring Boot 3 • PostgreSQL • Docker Compose • NGINX (Canary Reverse Proxy) • P

Metrics: Weighted Routing: 90/10 • Zero Downtime • ACID Transactional Core • Docker Orchestration

Summary: Corporate information system designed for municipal citizen services in Cali. Implements a l

Repository: <https://github.com/EduardCY/UAO-Software2-ServiCiudad-CanaryDeploy>

* Cloud Infrastructure, Kubernetes & DevSecOps with OWASP ZAP (2026)

Track: Cloud Infrastructure, IaC & DevSecOps

Tech Stack: Kubernetes (k8s) • Terraform (IaC / HCL) • Prometheus • Grafana • OWASP ZAP • NGINX Ingre

Metrics: Declarative IaC • Real-Time Telemetry • OWASP DAST Security Audit • k8s Orchestration
Summary: End-to-end Infrastructure as Code (IaC), container orchestration, and DevSecOps platform. Au
Repository: <https://github.com/EduardCY/UA0-DevOps-Kubernetes-Terraform-Pipeline>

* Comprehensive CI/CD DevOps Pipeline with Open Source Tooling (2026)

Track: CI/CD Automation & Cloud Delivery

Tech Stack: GitHub Actions • Docker / Container Registry • Node.js • Jest / Vitest • ESLint / Prettie

Metrics: Automated CI/CD Workflow • Zero-Intervention Deploy • Strict Code Quality Gate

Summary: Production-grade DevOps workflow engineered exclusively with Open Source tools and free-tier

Repository: <https://github.com/EduardCY/UA0-DevOps-Pipeline-CI-CD>

* Enterprise Network Topology & Routing Optimization with Graphs (2026)

Track: Advanced Data Structures & Graph Algorithms

Tech Stack: React 19 • JavaScript ES6+ • Tailwind CSS 4 • Vite • Graph Algorithms (Dijkstra, Prim, Kr

Metrics: Route Computation $O(E \log V)$ • Dynamic Topology Visualization • React 19 • CI Passing

Summary: Interactive analytics platform for topological modeling and traffic flow optimization across

Repository: <https://github.com/EduardCY/UA0-EDA2-Red-Empresarial-Grafos>

* Library Management on Linear Data Structures (LDS) (2026)

Track: Linear Data Structures & Memory Simulation

Tech Stack: React 19 • JavaScript ES6+ • Vite • Doubly Linked Lists • Stacks (LIFO) • Queues (FIFO) •

Metrics: $O(1)$ Memory Invariants • Reversible History (Undo/Redo) • Zero Memory Leaks

Summary: Simulation platform for library loans, returns, and reservations founded on formal Linear Da

Repository: <https://github.com/EduardCY/UA0-EDA2-Gestion-Bibliotecaria-EDL>

* Linux Kernel Syscalls Research & Custom Kernel Compilation (2026)

Track: Low-Level Operating Systems & Linux Kernel

Tech Stack: C (Kernel Space) • Linux Kernel Source • glibc • Assembly (int 0x80 / syscall) • GRUB • B

Metrics: Kernel Space (Ring 0) • Kernel Compilation • Custom Syscalls • Context Switching

Summary: Operating systems research project exploring the internal architecture and context-switching

Repository: <https://github.com/EduardCY/UA0-SistemasOperativos-Kernel-Linux>

* Pentesting, Hardening & Secure Networks Lab with Vagrant (2026)

Track: Cybersecurity, Networking & Virtualized Infrastructure

Tech Stack: Vagrant (IaC / Ruby) • VirtualBox • Ubuntu Linux • IPTables • Fail2ban • Bash Scripting •

Metrics: 100% Isolated & Reproducible Lab • Linux Hardening • Private Network Segmentation

Summary: Isolated, reproducible virtual laboratory built with declarative Vagrant specifications and

Repository: <https://github.com/EduardCY/UA0-SeguridadInformatica-Lab-Vagrant>

* RIPS New 2025 – Healthcare Validation & Data Processing Engine (2025 – 2026)

Track: Data Engineering, Healthcare & Async Microservices

Tech Stack: Python 3.11+ • FastAPI • Async Background Workers • PostgreSQL • SQLAlchemy • Healthcare

Metrics: Async Batch Processing • Regulatory Health Compliance • 100% Data Integrity

Summary: Data engineering pipeline for ingestion, syntactic/semantic validation, normalization, and b

Repository: Private / Confidential (Code demo available upon technical request)

* Decoupled Data-Driven Professional Suite (2026)

Track: Frontend Architecture & Reactive Systems

Tech Stack: JavaScript ES6+ • Semantic HTML5 • Modern CSS (Variables & Grid) • Data-Driven Architectu

Metrics: Lighthouse: 100/100 • Zero External Dependencies • Instant Cascading Synchronization

Summary: Modular, enterprise-grade web suite structured to synchronize professional profiles, certifi

[PROFESSIONAL CERTIFICATIONS]

* Professional Certificate: Enterprise Full Stack with Spring Boot & Angular

Issuer: Dev Senior Code | Date: 2025-09-16 | ID: DSC-FS-2025-0916

Verification: <https://devseniorcode.com/verify/DSC-FS-2025-0916>

- * Certified Full Stack Developer of Intelligent Solutions
Issuer: Dev Senior Code | Date: 2026-07-11 | ID: TLZZKQLTD6D-XYWWYXQQH-RLRJDTFKPK
Verification: <https://devseniorcode.com/credentials/TLZZKQLTD6D-XYWWYXQQH-RLRJDTFKPK>
- * Specialist in AI Foundations, Data Science & Machine Learning
Issuer: Dev Senior Code | Date: 2026-03-14 | ID: CLPPDQNQDYF-ZVKTS LZVK-XCWWTPHYRS
Verification: <https://devseniorcode.com/credentials/CLPPDQNQDYF-ZVKTS LZVK-XCWWTPHYRS>
- * Certified Applied Data Scientist & Artificial Intelligence
Issuer: Dev Senior Code | Date: 2026-03-14 | ID: DSC-MASTER-IA-2026
Verification: <https://devseniorcode.com/>
- * Oxford Placement Test (OOPT) – Official C1 Certification
Issuer: Oxford University Press / Colombo Americano | Date: 2021-09-13 | ID: OOPT-2021-09-93C1
- * FastAPI Course: High-Performance Backend & Asynchronous Microservices
Issuer: Platzi | Date: 2024-12-08 | ID: d3442094-4a79-4f63-abad-acd4202f916
Verification: <https://platzi.com/p/EduardYule/curso/1908-fastapi/diploma/detalle/>
- * Python: Comprehensions, Functions & Error Handling
Issuer: Platzi | Date: 2024-11-21 | ID: 7ca0ce69-4729-48e2-b416-1662f4b10760

[FORMAL EDUCATION]

* B.S. in Systems Engineering (2022 - Present)

Institution: Universidad Autónoma de Occidente (UAO)

Core Focus: Software Architecture, Advanced Data Structures, Relational Databases (SQL), Operating Sy

* Technical Baccalaureate in Industrial Drafting (2014 - 2021)

Institution: Instituto Técnico Industrial San Juan Bosco

Rigorous 7-year technical education in precision engineering drafting, spatial geometry, blueprint in

[EXPERIENCE & TECHNICAL SUPPORT]

* Technical Volunteer & Infrastructure Support - I Junior Pan American Games Cali 2021

Period: Nov 2021 - Dec 2021

Key Responsibilities:

- Delivered end-to-end technical support and logistical deployment across mission-critical technolog
- Assembled, diagnosed, and tested computing hardware and real-time network connectivity under high-
- Collaborated with broadcast engineers in live multi-camera transmissions, audio feeds, and multi-v
- Demonstrated agility, multidisciplinary teamwork, and swift troubleshooting under strict operation

[TECHNICAL COMPETENCIES / SKILLS MATRIX]

* Artificial Intelligence & Data Science:

Machine Learning • Scikit-Learn • Predictive Modeling • Scientific Python • Pandas • NumPy • Data Pre

* Backend & Cloud Microservices:

Java (17+) • Spring Boot 3 • Python (3.11+) • FastAPI • Flask • PHP • RESTful APIs • Layered Architec

* Database Engineering & Storage:

Relational SQL • Entity-Relationship Modeling • Database Normalization (3NF) • PostgreSQL • PostGIS •

* Frontend & Reactive Systems:

Angular • TypeScript • JavaScript (ES6+) • React / Next.js • Semantic HTML5 • Modern CSS (Variables/G

* DevOps, Tooling & Environments:

Git & GitHub • Docker Compose • Kubernetes (k8s) • Terraform (IaC) • NGINX • Linux / Bash • Pip & Vir

[SOFT SKILLS]

Critical & Analytical Thinking • Structured Problem Solving • Multidisciplinary Team Collaboration • As

[LANGUAGES]

* Spanish: Native (Mother tongue)

* English: C1 (Advanced Professional) (Oxford Placement Test (Score 93/120 - C1 CEFR))
